SUMMARY

Pre-final-year Computer Science student with hands-on experience in AI-driven applications, Machine Learning, and automation of enterprise data workflows. Published author at LREC 2026 with strong problem-solving skills and an interest in Software Development Engineering.

EDUCATION

Galgotias University, Greater Noida
B.Tech in Computer Science Engineering

2023 – 2027
CGPA: 9.5/10

WORK EXPERIENCE

Evalueserve, Gurugram
AI & Automation Intern

Jul 2026 – Present
Python, SQL Server, Azure AI, Power BI, FastAPI, React

- Built an **Intelligent Document Extractor** that reads contract documents (MSAs, POs, SOWs), extracting text directly from PDFs and falling back to **OCR** only when required, making digitization faster, cheaper and reliable on scanned files.
- Developed a **PF Management** platform using **Azure AI Document Intelligence** to extract employee details from Form 11 PDFs into **SQL Server**, and parsed EPF passbooks to auto-determine NPS eligibility and update employee records.
- Automated budget processing by handling **password-protected Excel** files, clearing stale inputs while preserving formulas, and loading refreshed budget data into SQL Server, replacing a manual process end to end.
- Automated financial-planning reporting with a one-click **.bat** refresh pipeline and migrated Excel sources into SQL Server, re-pointing **Power BI** datasets powering Profitability and Revenue dashboards.
- Created a **Python** monitoring tool for Power BI dataset refreshes and gateway health that flags failures with detailed error messages, reducing manual monitoring effort.
- Contributing to an **Unbilled & Deferred Revenue** platform (SQL Server, Microsoft Graph, ChromaDB, FastAPI, React) that tracks revenue, automates follow-ups and uses **Azure OpenAI** to summarize email threads into action items and risks.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, SQL.
- **AI/ML & NLP:** LLMs, Hugging Face, Transformers, Prompt Engineering, Retrieval-Augmented Generation (RAG), LoRA, QLoRA, Azure OpenAI, OCR.
- **Software Practices:** Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems.
- **Tools & Platforms:** Google Colab, Git, VS Code, SQL Server (SSMS), Power BI, MS Excel, N8N, Zapier, Make.
- **Soft Skills:** Communication, Team Collaboration, Leadership, Problem-Solving, Adaptability, Time Management.

PUBLICATION

 **QRAFT: QLoRA Retrieval-Augmented Fine-Tuning for Causal Span Extraction in Financial Documents**
2026

Published at LREC 2026, Palma de Mallorca, Spain — Under the supervision of Sonal Dabral

 Code

- Developed a causal span extraction system for financial documents as part of the **FinCausal 2026** shared task, framing span extraction as instruction-tuned generation.
- Fine-tuned **Qwen3-4B-Instruct** using **QLoRA** (4-bit) on 2K annotated financial instances and integrated **TF-IDF retrieval** of similar examples to condition generation.
- Achieved a **4.76/5 LLM-as-a-judge score**, ranking **4th of 9 teams**, and co-authored the accepted paper in the ACL Anthology proceedings.

PROJECTS

 **LegalLens | Next.js, Supabase pgvector, Gemini, Groq Llama 3.3 70B, Google OAuth**

2026

- Built a multi-user RAG platform with Google OAuth authentication, legal PDF/image uploads and natural-language querying with source-cited answers.
- Developed a document pipeline using OCR, chunking, Gemini embeddings and Supabase pgvector search, serving context-aware answers via Llama 3.3 70B with clickable citations and user-level document isolation.

 **SolarVox AI | Next.js, WebSockets, Twilio, OpenAI, Supabase**

2026

- Built a real-time conversational AI system combining a chatbot and a multilingual outbound voice agent for automated customer engagement and solar consultations.
- Integrated an end-to-end voice pipeline (ElevenLabs TTS, Deepgram STT, GPT-4.1, Twilio) with Next.js API routes and WebSockets for low-latency processing, plus a Supabase-authenticated dashboard for managing calls and sessions.

ACHIEVEMENTS

- **LeetCode** — Solved 400+ algorithmic problems; ranked in the Top 30% globally.
- **Smart India Hackathon** and **RoboWeek 3.0 Hackathon** — Competed in national innovation and robotics challenges building solutions for real-world problems.
